JOB EXPERIENCE

Web Developer | La Frontera Inc.

2023 - Present

- Tasked with maintaining WordPress themes & websites across 8 platforms, ensuring scalability and performance.
- Built a custom registration application for the Tucson International Mariachi Conference using JavaScript, PHP, and MySQL with Stripe API integration generating \$10,000+ revenue with 1,200+ registrations annually. Currently in the process of rebuilding this app using ReactJS and the NextJS framework for easier use for end users as well as La Frontera employees who need to manage and adjust registration data.
- Collaborate with cross-functional teams to deliver business-critical web application solutions

Web Developer (Freelance) | Tagline Media

2023 - Present

- Developed custom WordPress themes using PHP, JavaScript, HTML, and CSS while leveraging page builders including Divi and Oxygen, delivering tailored solutions that aligned with client brand requirements and business objectives.
- Implemented comprehensive digital marketing integrations by configuring Google Analytics and Google Ads tracking through Google Tag Manager, enabling clients to measure website performance and optimize conversion rates.
- Collaborated directly with client-facing employees at Tagline Media to gather requirements and translate business needs into functional web solutions, ensuring project deliverables met specifications while maintaining responsive design principles across all devices

Learning Assistant | Trilogy Education Bootcamp

2022 - 2023

- Mentored students in JavaScript, Node.js, and React; assisted with curriculum development

Web Developer (Freelance) | Good JuJu Agency

2022 - 2023

- Developed a custom WordPress theme using PHP, JavaScript, HTML, and CSS for the [Tucson Terror in the Corn](#) haunted corn maze attraction

PROJECTS

Tucson International Mariachi Conference Registration Application

- Full-stack application with PHP REST API, SQL database, Stripe payment processing, all integrated into a WordPress theme
- Results: \$20,000+ revenue, 3,000+ registrations processed
- This app is not currently live, but the code is available upon request.

WhatToWatch | [GitHub](#)

- Movie discovery app using React & Next.js and TMDB API with swipe-based interface. Implemented cross-page state management, responsive design, and real-time movie data integration.

CactusNectar Website Build | [Link](#)

- Custom WordPress theme using PHP, JavaScript, HTML, and CSS as well as Oxygen Builder.
